

CL-25

コ え ム し

BEAMAGE용 카메라 렌즈: 25mm 초점거리.

제품군 주요 특징

MANAGE THE BEAM SIZE

A simple solution is offered to those who need to profile beams that are larger than the BEAMAGE sensor. This solution is a beam reducing optical component called CAMERA LENS.

IMAGE VERY LARGE BEAMS

The camera lenses in the CL series work by indirectly imaging the reflection or transmission of the beam after it has hit a diffusing element. For larger beams, simply increase the distance between the diffuser and the BEAMAGE.

READY TO USE WITHIN MINUTES

The CL series is C-mount threaded so you can mount it directly on the BEAMAGE camera.
