

## **BEAMAGE-M2**

Automated M-squared measurement system. Comes with BEAMAGE-4M, 5 lenses, 3 ND filters, and 2 external beam-steering mirrors.

#### PRODUCT FAMILY KEY FEATURES

#### **NEW: AUTOMATIC SCAN**

With the "RUN M2 SETUP" button, the software automatically defines new parameters for a more precise  $\text{M}^2$  measurement. The "ISO SCAN" data set complies with the ISO-11146  $\text{M}^2$  measurement standard, being spread between -3ZR and +3ZD.

The automatic settings are updated after each calculation, considering the values of  $\rm Z_0$  and  $\rm Z_R$  from the latest measurement.

#### LARGE APERTURES

The only  ${\rm M^2}$  system on the market equipped with a complete set of 50-mm optics. Also, the sensor is 11.3 x 11.3 mm.

#### SIMPLE ALIGNMENT

Two beam-steering mirrors are included for quick and easy alignment of your laser into the system. The internal mirrors are factory-aligned and the pre-set height also simplifies the alignment.

#### COMPACT

The low-profile ingenious mechanics make it easy to fit the device on any optical table.

#### ISO COMPLIANT

The calculations are fully compliant with the ISO 11146 and 13694 standards.

#### **FAST ACQUISITION**

Make a complete, ISO-compliant measurement in only 20 seconds with the ROI feature, and in less than a minute with full-frame acquisition.

### FLEXIBLE & INTUITIVE SOFTWARE

In the easy-to-navigate software, both automatic and manual settings are available, so data points can be added or removed even after an automatic scan is completed.
